*Allowable Subject Matter*

Claims 1-15 are allowed.

The following is an examiner's statement of reasons for allowance:

The cited prior art taken alone or in combination fails to teach the claimed invention for constructing executable programs, such as software drivers in memory along with system configuration. Specifically, claims 1 and 8 are directed towards obtaining system configuration parameters, dynamically constructing with one code bundle and associating code module with first system configuration parameter to configure a software driver that can execute on a plurality of different devices so that differing software drivers need not be designed and stored for each different type of hardware configuration. Therefore, the claimed invention improves older code which has software fixes for hardware problems, and later, versions of the hardware are fixed, there is no need to execute old or unnecessary code to save valuable processing time and achieve efficiency.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
